

# Implementación de Wazuh

## Parte I - Importar la OVA de Wazuh

## Parte II - Instalación de agentes de recolección de logs

- ☐ Desde el apartado Agent management , seleccionamos la opción **”Deploy New Agent”**

Seleccionamos los datos del sistema donde instalamos el agente

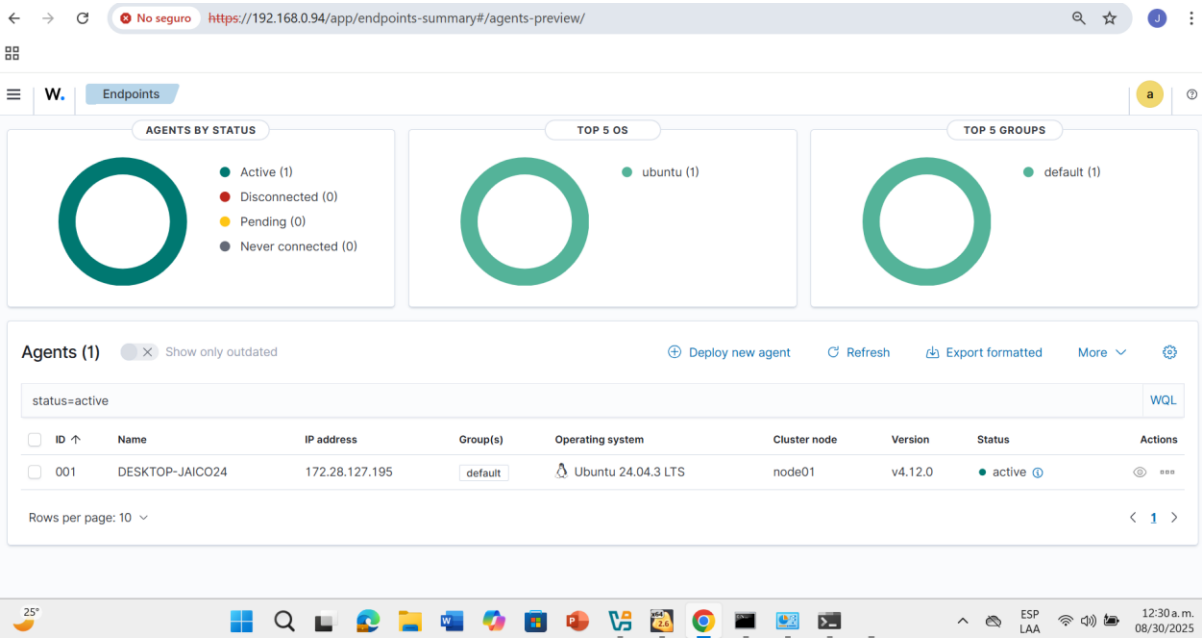

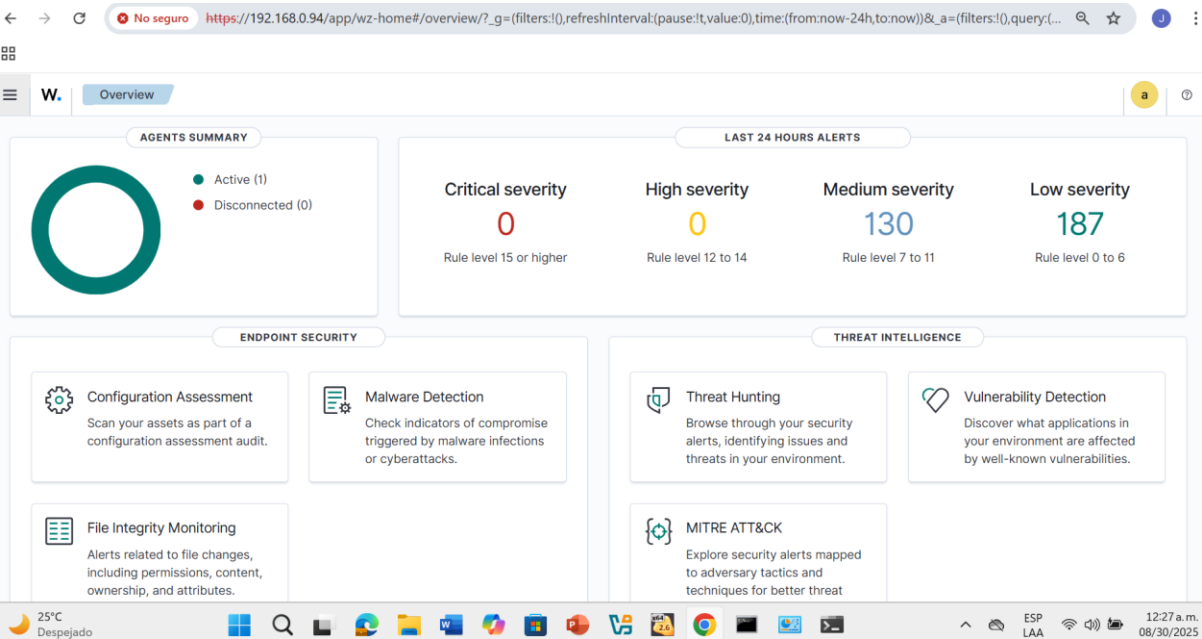

Deploy new agent

Select the package to download and install on your system:

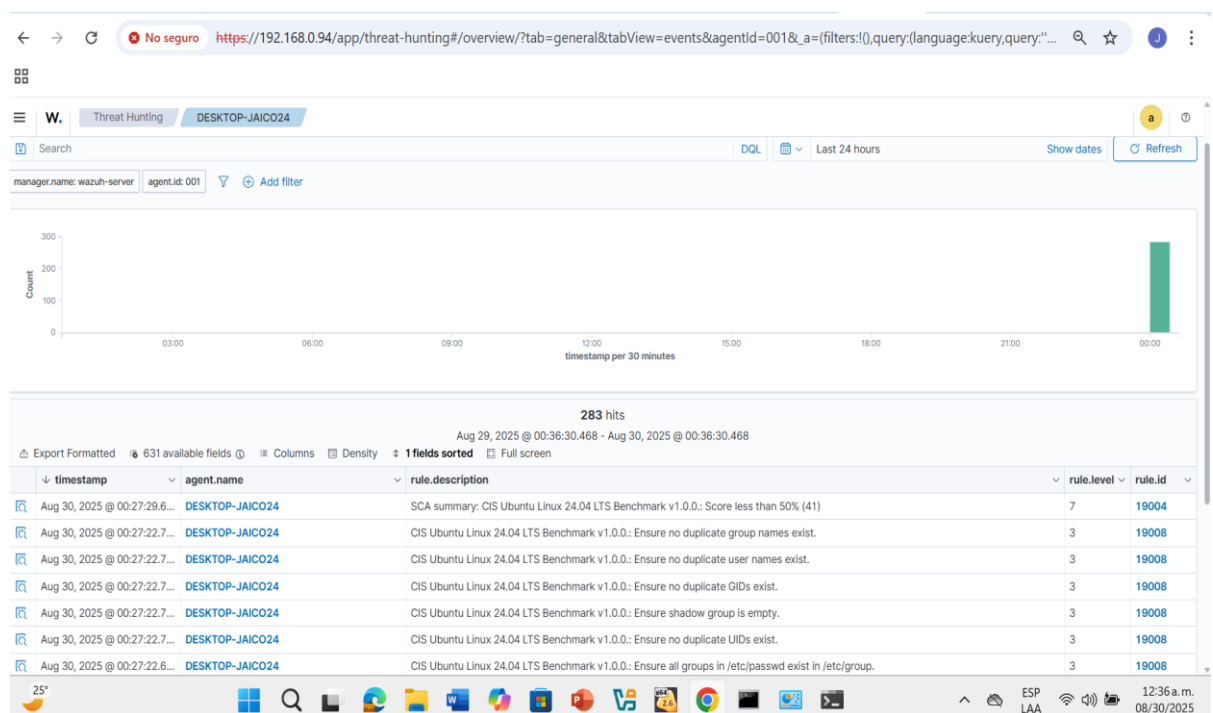

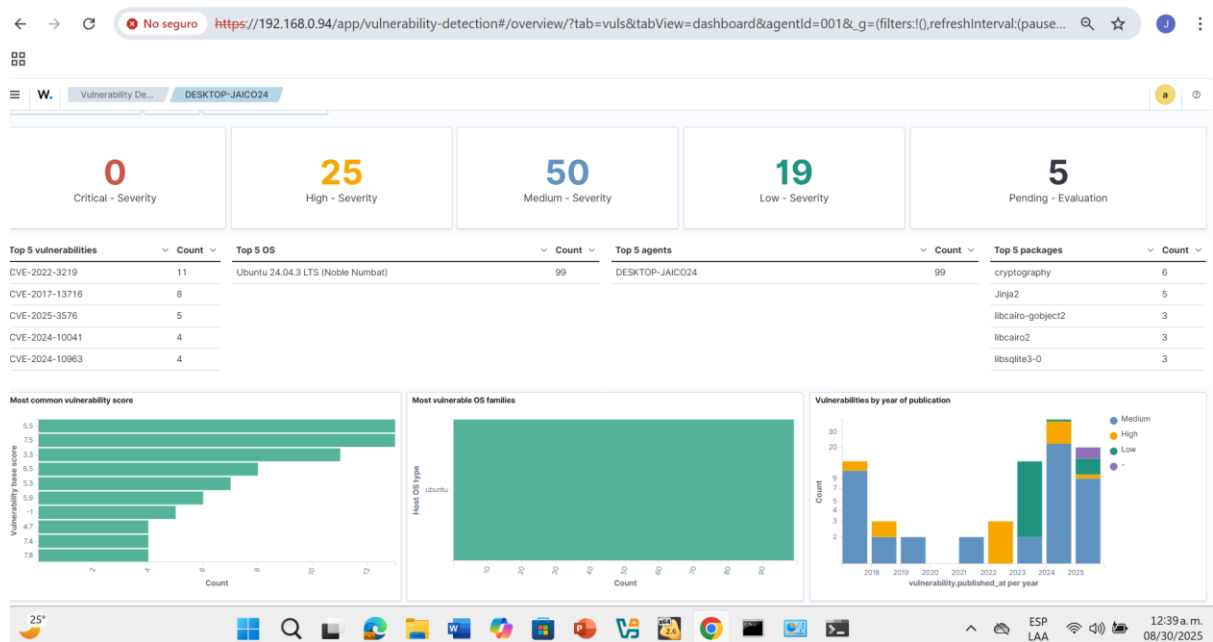

A screenshot of the 'Deploy new agent' form. It features three main sections: 'LINUX', 'WINDOWS', and 'macOS'. The 'LINUX' section is highlighted with a red box and contains four radio button options: 'RPM amd64', 'RPM aarch64', 'DEB amd64', and 'DEB aarch64', with 'DEB aarch64' being the selected option. The 'WINDOWS' section has one option, 'MSI 32/64 bits'. The 'macOS' section has two options, 'Intel' and 'Apple silicon'. At the bottom, there is a link to the documentation.
